

Milestone-1: Requirement Analysis & planning

Activity- 1: Business use create

Description

The school IT helpdesk receives multiple support requests daily from students and teachers related to common issues such as network connectivity, hardware failures, account access problems, and system performance issues. Currently, IT staff manually review each ticket to:

Identify the issue type.

Select the correct category and subcategory.

Inform the caller about ticket creation.

This manual process is time-consuming, error-prone, and not scalable as the number of requests increases.

Activity-2: creation of new update set

Description

Navigation Steps:

Go to All menus → Search for Update set.

Under System Update Sets → Select Local Update Sets.

Click the New button on the top right corner of the page.

Name: Project Update Set.

State: In progress.

Application: Global.

Then Save the Form.

Under Related links Click on the Make This My Current Set.

Then the Created Update Set will appear as Current.
