

Project Planning Phase –IV

2) User Acceptance Testing (UAT)

Objective of User Acceptance Testing

User Acceptance Testing ensures that the solution meets business requirements and is accepted by end users (Students, Teachers, IT Staff). As per your PDF Phase 4 and Phase 5, solution must be stable, reusable, and ready for demonstration.

UAT Scenarios - Test Scenarios

UAT Testing Diagram

UAT Sign-off Checklist (As per PDF Conclusion)

- End-to-end automation works: Ticket creation -> Auto Classification -> Email -> Closed
- Consistent classification, eliminates human error
- No-code solution, easy to maintain, scalable
- Data accuracy: Mandatory fields, auto-number, reference fields validated
- Security: Only authorized users can access/modify ticket data
- Deployment: Update Set exported to XML and shareable via WhatsApp/Mail
- Documentation complete for future reference

Overall, solution demonstrates ServiceNow can be effectively used to build scalable, maintainable, user-friendly automation without complex scripting.

Navigation for UAT

- For Student/Teacher UAT: Go to Incident WorkFlow Table -> New -> Enter Caller + Short Description -> Save -> Reload Form -> Verify Category/Subcategory auto-filled
- For Email UAT: All -> System Logs -> Emails -> Search Subject -> Preview mail
- For IT Admin UAT: All -> Local Update Sets -> Open Project Update Set -> State In progress to Complete -> Save -> Export to XML -> Download
- Get sign-off from users after successful verification

Date	28.09.2026
Team ID	SWTID-2026-6482
Project Name	Auto Ticket Classification using Flow Designer

	Input (Short Description)	Expected Output	User Acceptance
	WiFi not working in library	Category=Network, Subcategory=Wi-Fi, Email sent	Accepted - S
ticket	Projector not turning on in class 101	Category=Hardware, Subcategory=Projector, Email sent	Accepted - T
ticket	Forgot password cannot login to portal	Category=Access, Subcategory=Forgot Password	Accepted
outer ticket	My computer is very slow and hanging	Category=Performance, Subcategory=Slow Computer	Accepted
	Open assigned tickets	Tickets correctly categorized, no manual effort needed	Accepted - I
date Set	Check Emails table + Local Update Sets -> Export to XML	Email preview correct, Update Set complete and exportable	Accepted - F
