

2) Solution Architecture

The solution architecture is built entirely on ServiceNow platform using Custom Table and Flow Designer no-code automation. No external ML model or integration is used as per the PDF scope - it is purely keyword-based classification.

1. Go to All -> Flow designer -> New Flow -> Auto Classify School IT Tickets -> Build Flow
2. Trigger: Record Created, Table: Incident Workflow, Condition: Category is Empty, Done
3. Under Actions Select Flow Logic -> If condition -> SD is Wifi or Network -> Condition: Short description Contains Wi-Fi -> Condition 2: Contains Network -> Done -> Action Update record -> Set Category=Network, Subcategory=Wi-Fi -> Done
4. Else If -> SD is Projector or Hardware -> Condition: Short description Contains Projector -> Done -> Update record -> Category=Hardware, Subcategory=Projector -> Done
5. Else If -> SD is Forgot password -> Condition: Contains Forgot password -> Done -> Update Category=Access, Subcategory=Forgot Password -> Done
6. Else If -> SD is Performance -> Condition: Contains Slow Computer -> Done -> Update Category=Performance, Subcategory=Slow Computer -> Done
7. Email Action Setup: Action Send Email -> To: Caller->Email -> Subject: Your Request has been submitted -> Body: Ticket confirmation message -> Done -> Activate Flow

- Mandatory fields captured correctly.
- Auto-number generated without duplication.
- Category and Subcategory values stored accurately.
- Reference fields resolve correctly to user and group tables.

Date	28.09.2026
Team ID	SWTID-2026-6482
Project Name	Auto Ticket Classification using Flow Designer

[Performance], Subcategory [Choice: Wi-Fi,Projector,Forgot Password,Slow Computer], Short Description (String), State [New,In progress,On hold,Resolved]
Wi-Fi->Access, Projector->Performance. Config via Dictionary -> Advanced view -> Dependent field
Record Created on Incident WorkFlow where Category is Empty
Wi-Fi Else If Contains Projector -> Hardware/Projector Else If Contains Password/Login -> Access/Forgot Password Else If Contains Slow -> Performance
has been submitted, Body: Ticket confirmation with Number
Global, Export to XML
